

Grease

LUBRICATING ASSEMBLY GREASE

- ✓ High pressure and water resistant
- ✓ Anti-wear additives
- ✓ Rust prevention

Technical Info

- Colour: yellow.
- Odour: rubber odour.
- Temperature range: -30°C to +130°C, briefly to +150°C.
- Shelf life: 24 months.

Packing

Grease - 500gr	977130924
Grease - tube 100gr	977290924

Product

Characteristics

Most lubricants on the market are not pressure-resistant.

Bike7 decided to do something about this with Grease. we developed the highest quality pressure-resistant grease on the market.

This high-pressure and water-resistant lubricating grease distinguishes itself from other greases by its high adhesive strength that ensures longlasting deep lubrication.

Applications

- For optimal lubrication of moving parts such as the crank axle, headset,

Use

First clean the parts to be lubricated with Degrease. Let it evaporate or dry with compressed air.
