

Chain Clean

POWERFUL CHAIN & TRANSMISSION CLEANER

- ✓ Fast and safe
- ✓ For chains, derailleurs, cogs and chainrings

Technical Info

- Form: liquid.
- Colour: transparent orange.
- Odour: distinctive.
- Viscosity (at +20°C): 1mPa.s.
- Relative density (at +20°C): 0,790 kg/L.
- Spontaneous combustion: +230°C.
- Vlumpunt: +73°C.
- Water solubility: insoluble.
- Vapour pressure (at +20°C): 800 Pa.
- Boiling point/boiling range: 173°C – 240°C.

Packing

Chain Clean - bottle 1L	977270924
Chain Clean - can 5L	977280924
Chain Clean - 500ml	977340924

Product

Characteristics

Highly effective cleaner and degreaser for chains, derailleurs, cassettes and chainrings.

Regular use will prolong transmission life.

Use

- If you just want to clean the chain:
Spray Chain Clean on the cassette, chain, crankset and derailleur wheels while turning the chain. Letting it soak in for about thirty seconds is enough. Then rub your transmission with a dry microfiber cloth and/or blow your transmission dry with compressed air. (That way Chain Clean leaves a protection against corrosion).
- If you want to clean your whole bike:
Apply Chain Clean in the same way before cleaning your bike (if it is still dry). Twist the chain a little more. Then rinse your transmission with running water. You can now continue cleaning your bike (cf Bike7 Clean). After cleaning your bike, apply a new layer of oil to the chain or 2 layers of ProWax (cf ProWax).
