Product

Characteristics

Effectively removes contamination such as sand, dust, dried drinks, sweat, finger marks and grease.

Use

Use without water:

- Apply to entire surface.
- Allow the foam to soak in for a moment to dissolve the dirt and then wipe off with a damp microfibre cloth.

For use on a very muddy bike, first rinse it with a garden hose.

Then apply Fast Clean, let it soak in for a moment and remove with a microfibre cloth.

Tip: the use of a slightly moist microfibre cloth avoids the risk of micro-scratches.
