

Clean

POWERFUL BIKE CLEANER

- ✓ Fast
- ✓ Easy to use
- ✓ Safe on all surfaces

Technical Info

- Colour: transparent amber.
- Odour: pleasant fresh odour.
- Condition at room temperature: liquid.
- Flammability: non-flammable.
- Solubility: fully water-soluble.
- pH: 9.
- Biodegradable: yes.
- Shelf life: 36 months, dry, cool and frostfree.

Packing

Clean - bottle 1L	977150924
Clean - can 5L	977160924
Clean - 500ml	977330924
Clean - bottle 50ml	977155924

- Carbon safe.

Use

Always use this cleaner on a wet surface. So wet your bike first and then choose the way you want to clean the bike:

Either use the handy foam trigger to treat the whole bicycle with Bike7 Clean, allow it to act and rinse the bicycle with running water afterwards. The new foam trigger ensures better sticking foam and thus an even better effect. So you also know where you have already applied the product and where not.

Either spray Bike7 Clean onto the Bike7 Rasta and, if necessary, also onto the dirtiest areas of the bike. Rub the bike in and then rinse it with running water.

Either dilute a little Bike7 Clean in a bucket of water and use it in combination with our Brush Kit cleaning brushes and/or our Rasta glove.

Use of a high-pressure cleaner is not necessary. Use of too high a pressure (more than 40 BAR) can also result in water penetrating into the bearings.

Product

Characteristics

Get your mountain bike, racing bike or e-bike clean in a snap with Bike7 Clean! Bike7 Clean quickly breaks down the molecular structure of the dirt that clings to your bike. Dirt, mud, sand, traces of drink, sweat and grease are loosened by capillary action, then emulsified and simply rinsed off.

Effective and safe! As well as being impressively effective, our formula is also safe on all your bike's materials, including lacquer, aluminium, titanium, chromoly, seals and rubbers, and synthetic materials including carbon. A single cleaner for both your mule and your racing machine!

Want to make sure your mountain bike doesn't wear out prematurely? Clean it after every ride with Bike7 Clean. Our Bike7 Clean is 100% biodegradable and does not contribute to water pollution. So it's the ideal cleaner for caring for your bike in an environmentally-friendly way.

Applications

- Quick and thorough cleaning of the handlebars, frame, fork, click-in pedals, wheels,
- Removal of dried dirt, sweat, sand, dust, etc. from stainless steel, aluminium, titanium, lacquer, rubber, carbon fibre,

If you have first degreased your transmission with Bike7 Degrease, Bike7 Clean will create an emulsion in contact with the mixture of Degrease and dissolved lubricants. Thanks to this emulsion the dirt is lifted from the frame and easily flushed away. In this way you also avoid greasy streaks on your frame when wiping your bike dry.

Bike7 Clean is the ideal cleaner if you ride with our Pro Wax. When cleaning your bike with only Bike7 Clean, you can indeed only remove the dirt and worn film of Pro Wax around the chain. It does not affect the Pro Wax in the chain. So you only need to apply 1 layer of Pro Wax afterwards as maintenance.

Bike7 Clean is effective and safe for all types of bicycles and E-bikes.
