

# Multi Tape

ELASTIC PVC INSULATING TAPE

- ✓ Flexible and adapts to all shapes around all materials.
- ✓ Easy to tear.
- ✓ Waterproof and water resistant.

## Technical Info

- Composition: PVC and modified rubber adhesive.
- Thickness: 130 microns.
- Tensile strength: 26 N / cm.
- Elongation at break: 180%.
- Adhesion strength: steel: 2.4 N / cm, on own upper layer: 2.1 N / cm.
- Application temperature: between 0°C and + 40°C.
- Temperature resistance: from -5°C to + 70°C.
- Breakdown voltage: 8000 V.
- Insulation resistance: 100,000 MΩ.
- Maximum voltage: 600 V.
- Resistance: to UV rays, acids, salts, bases, water, sea water, greases.
- Shelf life: 24 months, kept cool and dry in its original packaging.

## Packing

Multi Tape black - roll 19mm / 20m (= 8pcs)

977380490

## Product

### Characteristics

Strong and stable with high permanent adhesion to all materials. Weather resistant and resistant to friction, water and UV rays. Easy to use on complex shapes and small connectors thanks to its high elasticity and moldability. RoHS3 compliant and made of self-extinguishing materials.

### Applications

- Insulation of cables and wires.
- Insulation of cable lugs, contacts and connectors.
- Electrical protection of cable connections.
- Repair of damaged cable sheaths.

## Use

- Apply on a clean support, overlapping.
- Press well.

Make at least one turn on the existing insulation or sheath for optimal results.
