Protect

## Technical Info

- Colour: colourless.
- Odour: sweet odour.
- Boiling point: 187°C - 211°C.
- Flashpoint: 67°C.
- Spontaneous combustion: 255°C.
- Water solubility: insoluble.
- Shelf life: 3 years.

## Packing

Protect - 500ml	977110924
Protect - 100ml	977120924

## Product

### Characteristics

Once your bike is completely clean you will want it to stay that way. Treating with Protect ensures a wafer-thin protective film over your whole bike. This water-repellent top layer lubricates as it protects and is the ideal finishing touch after maintenance.

### Applications

- Repels moisture with a transparent protective coat.
- Reduces the build-up of dirt.
- Prevents creaking and squeaking, especially in hard to reach places.
- Protects against corrosion and oxidation.
- Safe to use on various materials such as stainless steel, aluminium, titanium, lacquer, rubber, carbon fibre, ...

## Use

After washing, first cover your brake discs with microfibre cloths and then spray Bike7 Protect all over the bike while it is still wet. Then rub your bike dry with a microfibre cloth. Afterwards use Bike7 Protect to lubricate the small parts.
